Urgent Care

The urgent care center is staffed by Physicians, Physician assistants, and nurses.

Our urgent care center is quick and more cost efficient than an ER visit. We treat minor, yet acute cases such as bronchitis, upper respiratory infections, colds, sore throat, ear infections, high fever, nausea, vomiting, urinary tract infections, cuts, sprains & strains.

OPEN

Monday through Saturday
9:00 am to 8:00 pm
Sunday 10:00 am to 6:00 pm

Magnolia Health Systems

Reliability • Experience • Quality Care

An Extensive Array of Diagnostic

Services Including:

- Digital CT & Mammography
- Lab • Digital X-Ray • Ultrasound
- “Open” MRI • Nuclear Medicine
- Pulmonary Function Studies
- Cardiac Stress Tests • Sleep Studies
- Rehabilitation Services
- Urgent Care Services

Superior image quality and organ specific

It's about SPEED
Reduced time scan times.

It's about COMFORT
Comfortable patient bed and convenient imaging positions

Cardiac Nuclear Medicine

A Whole New Angle in Nuclear Cardiology Imaging Services

The exclusive chair design allows you to sit back comfortably during the scan, and the open design of the chair is accommodating to patients of any size or age.

The relaxed atmosphere created has obvious benefits. A relaxed patient moves less, creating less artifacts that can impair ability to evaluate cardiac images. Image quality is improved and diagnostic confidence increases.

Digital X-ray

Patient Well-being and Procedural Convenience

Immediate availability of digital images, radiographic examinations are generally conducted much faster.

Fewer Retakes
Fully digital images can, if necessary, be immediately processed for optimization.

No Over or Underexposures Anymore

Thanks to specially developed software algorithms, accurately depicting even the most difficult to capture areas of the human anatomy is possible

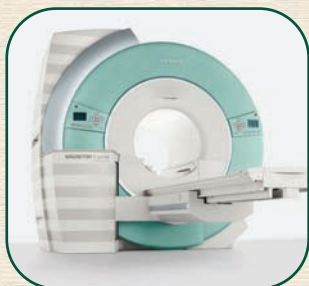

Digital MRI

The first Open Bore MRI
The most open design possible. Pushing all the boundaries.

No longer feel nose-to-nose with the magnet. Patients are more relaxed throughout their examination.

Feet first and heads out for most exams.

60% of all applications can be done with the patients head outside of the Open Bore.

Digital Mammography

High image quality, fast amortization, and advanced workflow features.

Digital mammography screening and diagnostics

Nuclear Medicine

All About Quality, Speed & Comfort
Whole-body and SPECT imaging with single and dual detector configurations for **SPEED** and **QUALITY**. It's unlimited flexibility guarantees patient **COMFORT** for all studies.

Comprehensive Cardiovascular and Ultrasound Services

High performance wherever you need it

Digital shared color system targeted for cardiovascular studies

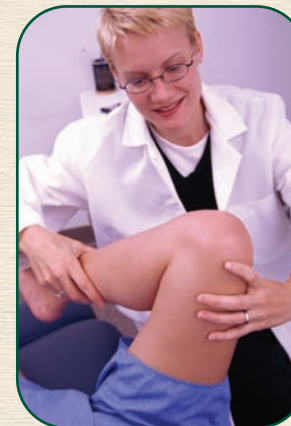

Rehabilitation Services

Physical Therapy which is a healthcare profession concerned with prevention and management of movement disorders.

Treatments Include:

Musculoskeletal for strengthening and prosthetic training,

Neurological for pain management and preventive measure,

Pediatrics for development training and family education, and much more.

Many patients are candidates for this type of treatment and do not know it, so please check with your doctor today to learn more.

All facilities and services available regardless of your healthcare provider. Please call for scheduling information 903-727-2948.
